LIGHT FASTNESS	IUF 402	Xenon lamp X	5 (Blue Scale)
HEAT AGEING	DIN 54004	3 gg 50 ⁰	4 (Grey Scale)

ARIA PRODUCT INFORMATION:

Type: Semi Aniline
Source: Italy
Average Hide Size: 4.8-5.0m²
Thickness: 1.0 - 1.2mm

ARIA is a semi aniline leather, characterised by its sumptuous handle and strikingly smooth finish. This unique leather is produced on the finest quality European hides.

The distinctive finish of ARIA is achieved by drying the hides under vacuum as part of the tanning process. This rapid removal of moisture creates a leather with luxurious body and structure, and an elegant almost 'grainless' look.

ARIA's muted colour palette is inspired by European sophistication. Combined with its exceptional durability, this unique leather is an excellent choice for both residential and commercial interiors.

All colours are in stock in our Australian warehouse and available for immediate off-the-shelf delivery.

Custom colours are available on request.

COMPANY ENVIRONMENTAL NOTES:

ARIA is produced by one of Europe's most progressive tanneries, supplying some of the world's leading furniture, automotive, marine and aviation companies. All manufacturing practices are in accordance with the ISO 14000 Standards, which recognise organisations that are committed to environmental management and operate in an environmentally sustainable manner.

The tannery has made a public commitment to environmentally sustainable processes and ethical standards that seek to preserve a clean world for future generations.

ARIA is produced using only water-based dyes.

The tannery complies with stringent local environmental regulations, with all tannery wastage (liquid, gas and solid) treated to European Standards on-site and again at a shared off-site facility.

Detailed product and tannery environmental notes are available on request.
